

PRINCE JAIN

Full Stack Developer | BFSI & Insurance Systems | Node.js, Next.js, MySQL/PostgreSQL
9702319850 | prince.jain.1103@gmail.com | [LinkedIn](#) | Mumbai, Maharashtra

PROFESSIONAL SUMMARY

Backend-focused Full-Stack Developer with 2.6 years of experience building production-grade Insurance and BFSI applications using Node.js, Next.js, Express.js, MySQL, and PostgreSQL. Experienced in developing secure REST APIs, third-party API integrations, multi-tenant systems, RBAC-based platforms, and database-driven applications. Skilled in leveraging AI-assisted development tools such as Cursor AI and GitHub Copilot to improve development efficiency and accelerate delivery.

TECHNICAL SKILLS

Backend Frameworks: Node.js, Express.js, NestJS(Exploring)

Frontend / Full-Stack: Next.js, REST API Integration , AI-Assisted Development: Cursor AI, GitHub Copilot

Databases & ORM: MySQL, Sequelize, PostgreSQL (Migration and Development)

Security & Tools: JWT, RBAC, VAPT-Aligned Secure Coding, Git, Postman, Swagger, AWS EC2/S3

PROFESSIONAL EXPERIENCE

Software Developer — KIS TECH SOLUTIONS PVT. LTD

March 2024 – Present

- Developed and maintained 20+ production-grade REST APIs supporting Insurance and BFSI workflows including quotes, policy issuance, payments, claims, and endorsements.
- Integrated 5+ insurance provider APIs for real-time quote generation, policy issuance, and policy synchronization.
- Implemented JWT-based authentication and RBAC for Admin, Corporate, Manager, and POSP users across multiple business modules.
- Optimized database performance through indexing, query tuning, and Sequelize scopes, improving API response times on high-traffic endpoints.
- Reduced bulk data migration time by ~90% by building a Node.js utility capable of processing 100,000+ Excel records into MySQL in under 30 seconds.
- Built reporting modules with filtering, pagination, and dynamic PDF/Excel exports while following VAPT-aligned security practices.

KEY PROJECTS

Insurance Operations & Admin Management System

Tech: Node.js, Express.js, Next.js MySQL, Sequelize, RBAC

- Developed backend APIs for admin operations, user management, master configuration, policy management, and dashboard analytics.
- Implemented JWT-based authentication and RBAC for Admin, Corporate, Manager, and other internal users.
- Built reporting APIs with filtering, pagination, and dynamic Excel/PDF exports.

POS Agent Onboarding & Lifecycle Management Portal

Tech: Node.js, Express.js, Next.js , MySQL, Sequelize

- Developed backend services for POSP onboarding, registration, KYC verification, certification management, and agent operations.
- Implemented role-based workflows for POSP users and integrated insurance-related business processes.
- Developed APIs for agent management, document handling, certification tracking, and policy-related workflows.

Motor Insurance Aggregator - Multi-Provider Quote & Issuance Engine

Tech: Node.js, Express.js, Next.js, MySQL, Sequelize

- Integrated multiple insurance provider APIs for real-time car and bike insurance quote generation, proposal submission, and policy issuance.
- Developed APIs for vehicle details, IDV calculation, premium processing, and policy synchronization across both product lines.
- Implemented insurer-specific request/response mapping, validation, and business rules while maintaining a standardized application response structure.
- Handled differing insurer response formats and standardized data across providers for consistent workflows.

Term Life Insurance Aggregator - Real-Time Quote & Policy Issuance System

Tech: Node.js, Express.js, Next.js, MySQL, Sequelize

- Developed backend services for term insurance purchase journeys including customer details, KYC, quotations, proposals, and policy issuance.
- Integrated multiple term insurance providers for real-time quote generation and policy processing.
- Implemented insurer-specific validations, business rules, request/response mapping, and policy synchronization.

E-Learning Module - Training & Certification System for POSP Agents

Tech: Node.js, Express.js, Next.js, MySQL, Sequelize

- Developed backend APIs for e-learning administration and end-user learning workflows.
- Implemented **assessments, exam workflows, scoring, certification, and user progress tracking** for POSP agents.
- Developed reporting APIs to track course completion, assessment results, certification status, and user learning progress.

MySQL → PostgreSQL Database Migration

Tech: MySQL, Sequelize, PostgreSQL

- Migrated application database schemas and data from MySQL to PostgreSQL.
- Handled differences in data types, enums, boolean values, numeric/decimal fields, timestamps, and SQL queries.
- Updated Sequelize models and backend queries to ensure PostgreSQL compatibility.

AI Resume Analyzer — AI-Powered Resume-to-JD Matching & Interview Prep Tool

Tech: Next.js (FullStack), AI/LLM API Integration

- Built a full-stack app that parses an uploaded resume and job description to generate a skill-match score with missing-skill insights.
- Integrated an AI/LLM API to auto-generate 5 tailored sample interview questions based on the job description and candidate profile.
- Designed the parsing and scoring pipeline to handle varied resume formats and deliver structured, actionable feedback.

PulseCheck — Lightweight API for Real-Time Service Uptime Monitoring

Tech: Node.js, Express.js, Next.js, MySQL

- Built a backend health-check API to monitor real-time server and API uptime/status across services.
- Implemented endpoints to track service availability and surface health metrics for monitoring dashboards.
- Designed low-latency health-check routes suitable for integration with uptime monitoring and alerting tools.

EDUCATION

B.E. in Computer Engineering — Mumbai University

2019 – 2023

CGPA: 8.76 / 10

ADDITIONAL

- **KAITO Star Award** for outstanding backend development performance.
- Working with Docker and CI/CD pipelines to improve backend development and deployment workflows.
- Member of Leo Club of Dombivli.
